## **BLOCK #2**

**9" Block**

Block #2 is made from the following components. (20) Y-Squares, (8) Half-Square Triangles (4) Rectangles

Variations using the same components. There isn't a single triangle in this whole block even though it looks like is it full of them. Pay close attention to the way the pinwheels are spinning. It is easy to get confused. I stitched all of my pinwheels together, and then assembled the rest of the components.
